

Agricultural Film Recycling Program

Plastic film used in the agricultural industry falls into different groups. These groups are outlined in the boxes below. Keeping these groups segregated is critical to the success of a recycling program.

The recycling program is designed to be simple. Segregate the different types, collect into the free designated bags and notify us of pickup or take to a designated local depot. We invite you to follow the four steps below:

LLDPE Group

Bale Wrap

Greenhouse Film

Each farmer will receive, by mail, 15 free empty collection bags.

The plastic film will be segregated by group and placed into the collection bags

When you have 10 or more full bags, notify Switch Energy Corp for free pickup.

Program participants can inquire about discounts on new plastic film purchases

Polypropylene Group

Net Wrap

Bale Twine

Polyethylene Group

Silage Tarps

Ag-Bags

Shaving Bags, Salt Bags,
Fertilizer Bags

Any Coloured
Polyethylene
